

Activity Reporter for Android

Activity Reporter for Android app is a complete solution to secure your tablets and Android operated phones.

Activity Reporter for Android keeps a vigil check on the applications opened, incoming and outgoing calls, websites visited, sent and received SMSs, and also logs all the activities done by a client at a particular time. It also keeps a record of GPS locations of the Android tablet or phone at specific durations. Moreover, it maintains log of all the emails and installed apps.
